DETAILED ACTION

1. It is noted that one **IDS** filed on December 29, 2003 and the other IDS filed on October 21, 2003 are both received. **Claims 1-15 are pending** now. An action follows.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. **Claims 1-14**, drawn to an aqueous microemulsion and its process of making, classified in class 526, subclass 242.

II. **Claim 15**, drawn to a cured fluoropolymer comprising repeating units from a liquid fluorinated with a cure site, classified in class 525, subclass 50+.

3. The inventions are distinct, each from the others because of the following reasons:

Inventions I and II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as a polymeric compound, and the inventions are deemed patentably distinct since there is nothing on this record to show

them to be obvious variants. In the instant case, the cured polymers may contain any polymer as long as it is containing a cure-site and is compatible with other additives. The microemulsion in Group I may be used as a dispersion or an emulsion.

4. The polymer in Group II may use materially different types of monomers in addition to the liquid cure-site monomer used in Group I, and may contain various additives. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention. Additionally, the process of Group I can make the polymer or copolymer other than the one used by Group II.

5. Because these inventions are distinct for the reasons given above and the search required for each group is not required for other groups have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. It is noted that no phone call was made to **Brian E. Szymanski** by the examiner due to the complexity. Applicant is advised that the reply to this requirement to be

complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

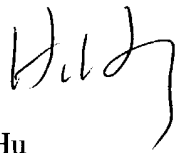

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
